

SIGMA³ Selected by Gunnison Energy for Mancos Shale Project

SEG, Las Vegas – November 4, 2012 – SIGMA³ Integrated Reservoir Solutions, Inc. (SIGMA³) was selected by Gunnison Energy to provide completion and fracture stimulation design, execution and microseismic monitoring for their first horizontal Mancos well.

APEX, A SIGMA³ Company, supported Gunnison in the planning and design of its first horizontal well in the play and provided completion strategy, stimulation design and real-time fracture consulting, including microseismic. The well recorded initial flow rates of approximately 5,000 MCFD and is paving the way for an asset-scale development program in Western Colorado.

“We appreciate the value that SIGMA³ brings to our team” said Mike Cleary Vice President of Operations at Gunnison. “Working together we are finding technical solutions to the challenges in our unconventional reservoir development.”

“Gunnison Energy is a valued customer,” said Jorge Machnizh, CEO of SIGMA³. “We are excited by their position and success in the horizontal Mancos arena in Colorado.”

About SIGMA³ Integrated Reservoir Solutions

SIGMA³ Integrated Reservoir Solutions, Inc., is a leading technology provider for the oil and gas industry that advises oil and gas companies where and how to drill the most prolific wells, while maximizing their production. Through a truly integrated, reservoir-centric portfolio of technology, expertise and services, SIGMA³ delivers an unprecedented level of integration that spans reservoir understanding to production optimization.
